

PROCESS PEER REVIEW

During this project you have worked together as a group. During this collaboration you may have noticed certain good or bad behaviour from yourself, your group members, or your group as a whole. This process peer review exists out of two parts: 1) Group dynamics with Lewis self-test and reflection, 2) constructive feedback about behaviour during group work.

Be sure to submit the process peer review on time as it will be discussed during the project meeting with you tutor.

1. GROUP DYNAMICS REALTED CULTURAL DIFFERENCES

Include below the *Lewis triangular diagram*, containing plot of all group members, you made during WKS:

Specify below where do you see potential synergies and frictions between group members related to the expectation of PRJ?

The synergies is where the x is and the friction would be outside of that.

2. CONSTRUCTIVE FEEDBACK

Below you find a table that is intended for you to convey what your impression is related to the work contribution of each member towards the project. Please indicate in percentages how you perceived the work division was per item.

	Situation/behaviour	Effect/impact	Need/Way forward
Stoycho Stoychev	Getting calls at random times without messaging me or letting me know.	I can't focus on programming the application.	Need to message first if I'm available to talk.
Stela Trencheva	Late on showing how the functionalities of the scheduling work.	We don't know how the scheduling works and don't know how to help.	After completing the functionalities you should show us how it works.
Veronika Valeva	Being late for the tutor meeting.	We have to wait for her before we start	If you need help waking up or you can't make it on time let us know.

Below you are expected to assign a grade between 0 and 10 per group member (including yourself) on how well the person contributed to the project, and how proactive this person was.
